

HONEYWELL UVEX AVATAR® RX

See the Difference in Comfort, Fit and Style

Honeywell
UVEX®

A VISION FOR GREAT PROTECTION

We are all different. And we all have different safety needs. Combining innovative technology and design features into a safety prescription eyewear frame with multiple adjustability features, Honeywell Uvex has created Avatar RX to make the difference in terms of quality, fit, comfort and style.

Honeywell Uvex Avatar® RX is a premium prescription safety frame dedicated to workers who need corrective lenses and work in industrial applications where the use of industrial safety eyewear is a must.

Honeywell Uvex Avatar RX is a comfortable, protective eyewear frame with innovative features, offering workers excellent customization and comfort according to their facial profiles and unique optical requirements.

Honeywell Uvex Avatar RX has an ultra-light design and numerous cutting-edge features such as flexible nose pads for enhanced comfort and adhesion, wire core temples providing unsurpassed adjustability and the unique patented

indirect venting technology that helps to reduce fogging.

The RX carrier ensures a maximum field of vision and protective coverage while accepting an unlimited range of lenses and powers. An optional accessory pack includes a full seal adapter to protect the eyes against debris and dust and a strap to prevent the glasses from falling off.

Enjoy a universal prescription lens frame providing improved protection, adjustability and customizability for the majority of facial profiles. Standardize workers' eye protection with the Avatar family model that best suits their needs – Avatar, Avatar OTG and Avatar RX.
